Professional Summary

Full Stack Web Developer with hands-on experience in building web applications using **Node.js**, **Express.js**, **MongoDB**, and **EJS**, along with solid knowledge of **React.js** and **TypeScript**. Completed a structured, self-driven coding bootcamp at **Brototype**, focusing on backend development, data structures, and modern frontend practices. Experienced in developing user management systems and building RESTful APIs. Quick learner, problem-solver, and passionate about clean, maintainable code. Currently looking for an opportunity to work with a modern tech stack and contribute to real-world projects.

Projects

Ecommerce Project

<https://github.com/Sameeha1992/Wrist-project>
